# CREATING A FLASK PROJECT

Step1: Open Pycharm in your desktop and create new project.

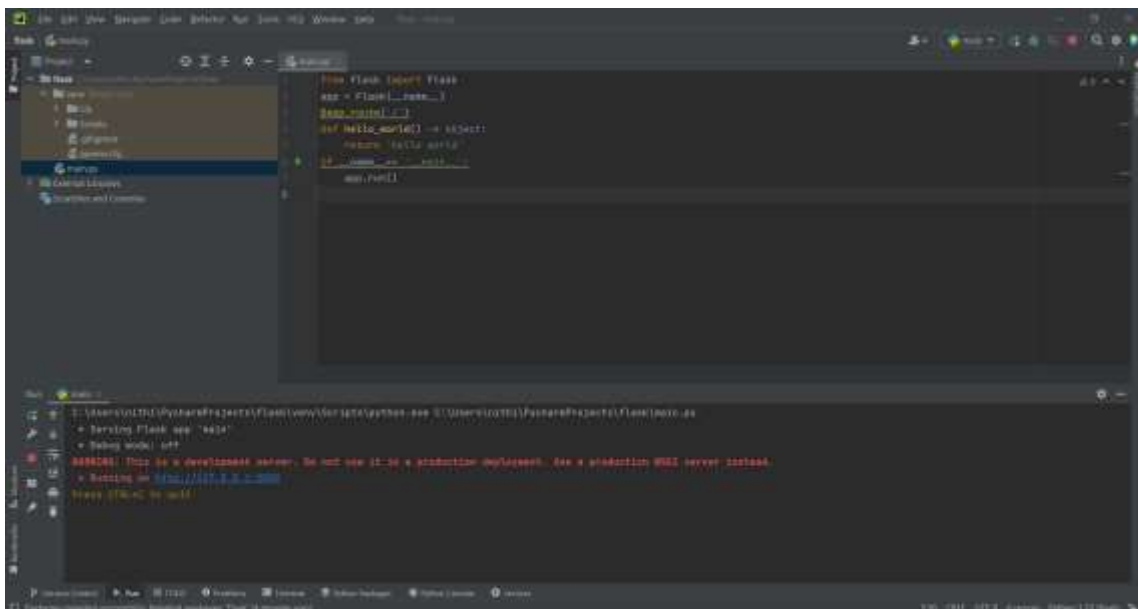

Step 2: Name the project as a flask and type the below code to create flask project. Before creating flask project, you have to install the flask module.

```
from flask import Flask
app = Flask(__name__)
@app.route('/')
def hello_world() -> object:
    return 'hello world'
if __name__ == '__main__':
    app.run()
```

Step 3: Run the code. In the terminal, the http://127.0.0.1:5000 address will appear.

Step 4: Click on that host address and it will redirect you to webpage. Then it shows "Hello World" on the browser.

hello world
